Osaki Medical Corporation

With **five promises** in mind, dacco continues to face mamas, babies, and midwives.

1 To keep “safe and secureness”

We have been providing medical products for decades and always placing the utmost importance on the safety of our products and their users.
We believe it is dacco's mission to ensure the safeness and peace of mind of mamas and their babies.

2 To devise “materials and functions”

Throughout all the stages, from pregnancy to childbirth as well as newborn care, mamas and babies are very sensitive to their surroundings, both mentally and physically.
dacco devises ingenious materials and functions for its products so that mamas' and babies' everyday life will be more comfortable.

3 To pursue “fashionable design”

Mamas also need to be stylish while busy with child care and housework.
dacco offers elegant, clean, and feminine designs for mamas, for babies, its designs are soft, warm, and perfectly fit both boys and girls.
dacco pursues stylish, fashionable designs that make mamas feel good.

4 To be committed to “ease of use”

dacco is committed to the idea of products that are easy for everyone to use.
This is because we want our customers to experience true comfort while using our trouble-free products.

5 To realize your “voice”

dacco has created a wide variety of products by always listening carefully to lots of opinions from midwives and mamas.
We will continue to value each and every voice of our customers, and shape them into reality.

OB Linen Set

- A set of sterilized obstetric procedural items contains an assortment of medical and sanitary materials needed during delivery.
- It is able to choose from a variety of obstetric/maternity mats and sheets to suit the purpose.
- Combining items needed for delivery as a set allows to streamline operations needed for preparation and regeneration.
- Combining items into a set shows the cost for each delivery operation, facilitating cost management.
- Since the items are disposable, they help prevent infections.
- Procedures can be carried out any time, even during disasters, since the items in the set are sterilized.

dc Pad α Guard for Use Immediately After Delivery/Sterilized dc Pad α Guard for Use Immediately After Delivery

e-B
Contains
Slim L

- Sterilized pad with combination of a pad and a pair of shorts for delivery, which can be used immediately after delivery.
- "Soft Laine α Guard "with breathable 3D side gather, which thoroughly guards from leakage, stiffness and misalignment, is used for the delivery pad.
- 2 types of underwear are available – skin-friendly "e Shorts" made with 100% cotton, and "α Shorts", which perfectly fits with the Soft Laine α Guard L. Both kinds of underwear can be opened from 3 sides, which makes it easy to replace the pad, and comfortable with stretch material, that helps keep the pad in the right position.
- The B type loincloth is water absorption/waterproofing type which the nonwoven and the laminating film are stucked together, prevents the leakage of lochia and the body temperature decline.
- With the type containing Slim L, pads can be changed simply by pulling out the feel Slim L layering on top of Soft Laine α Guard L.

3D side gather

- This is a pad used for delivery, for something extra and provides a sense of security, with thorough guard for leakage, stuffiness, and misalignment.
- The 3D side gather fits the body snugly, and prevents side leaks.
- Pulverized pulp and high-absorption polymer, which allow quick and large amount absorption, and prevent reverse flow.
- Comfortable dry feeling and alleviates stuffiness by permeable back sheet.
- The soft-to-the-touch surface material prevents irritation due to friction.
- The thick absorbent softens sensitive genital irritation after delivery like a cushion.

Characteristics of product

L size

Position of the misalignment
Prevention adhesive strip: Front
Weight: about 70g
Total length: 56cm
Width: 30cm

Wide front and back

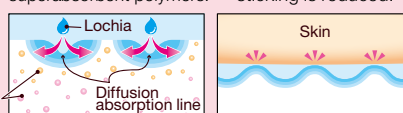

Thoroughly guard from front and back leakage.
The pad wraps around the front side and entire buttock and it is free from fear of leakage.

Speed absorption structure

Quick absorption thanks to the diffusion absorption line and two types of superabsorbent polymers.

Presswork

Only a small area of the surface material touches the skin, and discomfort arising from sticking is reduced.

Perfectly fits the body by special curve

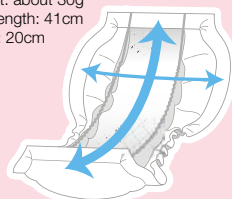

No gap between the pad and the body.

Usage scene

M size

Position of the misalignment
Prevention adhesive strip: Center
Weight: about 30g
Total length: 41cm
Width: 20cm

Wide front and back

Scene of use

For removing dirt from the body

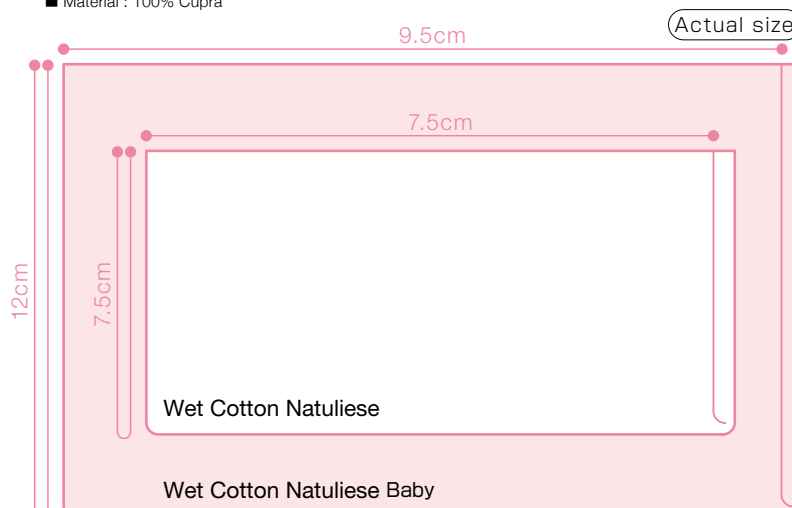

For around face and mouth

Clean Cotton Natuliese Baby

Lotion type **A.C.**

Part number	Type	Standard · Contents	Quantity in a package	JAN code
95001	—	Nonwoven 9.5cm×12cm Two-fold, 1 sheet (30 packs)	40 boxes	4971032950013

■ Brand name : Wet Cotton Natuliese Baby ■ Ingredient in a package : Purified water
■ Material : 100% Cupra

Characteristic of "Bemliese™" sheet pursuing gentleness to the skin

Made from cotton linter

It uses "Bemliese™" of ASAHI KASEI CORPORATION, which is produced entirely from cotton linter between it's seeds and long fibers which can only take 3% of cotton.

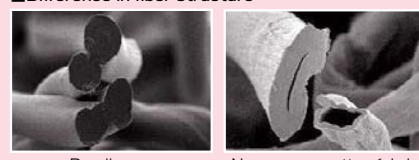

■ Cross-sectional diagram of cotton (flowers)

Have less skin damage

Since the fibers are shaped smooth and round than other fibers, they are unlikely to cause damage to the skin due to friction.

■ Difference in fiber structure

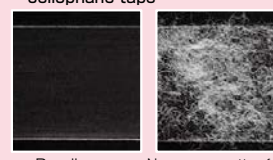

Bemliese™

Non-woven cotton fabric

Have less fluff falling

The sheet structure prevents the fibers from falling, hard to remain on the skin, and ideal for care before and after breastfeeding and for wiping off lochia.

■ Comparison of the amount of fibers adhering to cellophane tape

Bemliese™

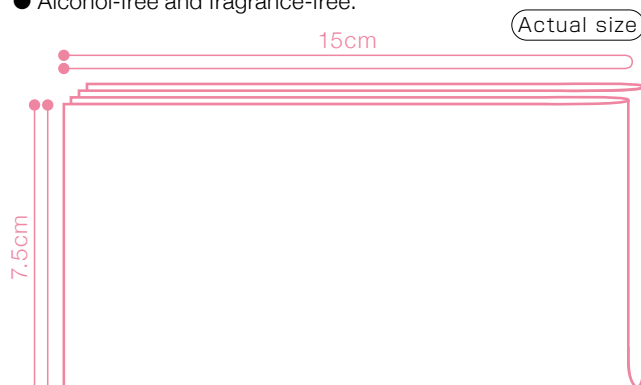

Non-woven cotton fabric

Baby Tooth Care Wiper

- Individually-wrapped sterilized wet sheet, using ultra-fine fiber Bemliese™ nonwoven fabric made from cotton, and 100% soaked with purified water.
- Fine fiber fabric wipes off the dirt without easily damaging baby's teeth.
- Nonwoven fabric specification with almost no residual fluff when wiping.
- Aluminum package prevents water evaporation and keeps the sheet clean for use.
- Alcohol-free and fragrance-free.

How to wipe the teeth

If you want to wipe the fine areas of the teeth
Wind the sheet around your finger, and wipe the teeth.

If you want to pinch the teeth and wipe them
Spread the sheet and wipe the teeth.

Characteristics of ultra-fine fiber Bemliese™ (a cupra filament nonwoven)

Wipe away softly and clean!

Since it uses a fabric whose fiber Bemliese™ are ultra-fine, it captures even the finest stains and dirt that have attached to the teeth, and wipes them away softly and clean.

Pelvis Belt Before And After Delivery

- This is the pelvis belt that firmly support pelvis before and after delivery.
- Easy to move and comfortable to wear with the front curve along the stomach and narrow width which is hard to bite into wound.
- Hard to slip with anti-slip processing.
- Free-sized with the entire surface made of one-touch tape and can be worn without worrying about the size from before and after delivery.
- Easy to wear just pulling and taping the one-touch tape even in restroom or changing clothes.
- Hard to see through from the outer with thin mesh fabric which makes difficult to sweat and comfortable to wear.
- The entire curved surface and also soft thin material make hard to bite into wound, and easier to wear even after Caesarean section. (There are individual differences in wearing feeling, depends on the position and size of the wound and the body shape etc.)

- Rough indication of wearing period: Pregnancy to after delivery (Immediately after delivery to around 3 months)
(The above period is a guide. It can be worn continuously after that.)

- How to wear

Part number	Type	Standard (applicable size) · Contents	Quantity in a package	JAN code
60813	Free Black	Hip 87cm~105cm 1 pc	20 boxes	4971032608136

■ Shape and compression designs

- Maternity compression socks to alleviate swelling by warming up ankles and gradual compression.
- Warm up legs as if wearing a leg warmer by far-infrared material used for ankle.
- Comfortable to wear all year round without stuffiness feeling by using humidity control material.
- Includes Q&A describing how to wear, causes of swelling and troubles with poor circulation.
- For nighttime, it can be choose between cute "pink" and the calm color "gray", gentle coloring that matches your pajamas.

■ An infrared ray material

An infrared ray material

The invisible wavelengths of infrared rays invigorate the molecular vibrations on the surface of the human skin, and generate heat. Heat is transmitted by the blood and other substances, so a feeling of warmth continues from the center of the body.

Analysis of temperature distribution by thermography

- With toes, which is perfect to wear when getting up, for daytime use.

Characteristics of Christer®

Teijin's Christer® is a hollow fiber, so it has a light, fluffy, zigzag structure for a bouncy touch. The fiber surface is silicon-coated to give it both a soft texture and cushioning properties.

Differences in fiber structure

Christer®

Ordinary polyester

Differences in the structure of fiber mass

Christer®

Ordinary polyester

- Skin-friendly touch breastfeeding cushion which is hard to become useless and also can be choose from 2 sizes according to the lumbus around size.
- Special fiber "Christer" is used for the padding that it is economical because it is hard to become useless and can be use for a long time.
- Both the cover and the cushion are hand washable, so they can be used hygienically.
- An extra replacement cover (sold separately) is convenient when the current cover is being washed.
- The cover surface that touches the baby's skin has a gentle feeling to the skin by using high quality pile fabric with 100% cotton.

Hand and Footprint Album

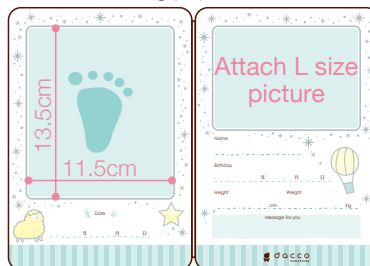

- A hand and footprint album with a cute design, which carries wishes for baby.
- It can leave the cute memories of the baby's growth in color by the hand and footprints.
- It comes with a special envelope that is handy if giving it as a gift or sending it through the mail.
- Includes coloring paper that lets you do it again if it doesn't come out right, and a colorless, transparent special coloring liquid that will not leave the ink color on baby's hands and feet.

Dream May your many dreams come true...

Friends May you make lots of friends...

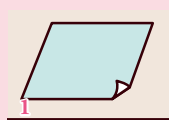

Color of coloring paper : Green

Color of coloring paper : Yellow

- Need a glue or double-sided tape to create album.

How to take hand and footprints

On a flat desk or board, fix a piece of coloring paper so that the front face (the face with the color) is facing up.

Take out a sheet with the coloring liquid on it from the pack, and apply evenly over the palm of baby's hand or the sole of baby's foot. (The coloring liquid is transparent.)

Just like the figure above, immediately press it onto the front face of the coloring paper. (If you press baby's hand or foot from above, you will get a clear print.)

Slowly release hand or feet. Dry the coloring paper securely in a flat place until the coloring liquid is completely dry.

Osaki Eye Mask

- Nonwoven fabric eye mask in band-aid type, which is used for high bilirubinemia phototherapy.
- Middle-layer aluminum foil surely blocks light ray.
- Gel adhesive prevents skin rash.

For low-birth-weight baby

For newborn

Usage

Remove sliminess that is typical to newborn, close the eyelids, and adhere the mask so that light shielding section touches the eyes.

Do not stretch the Band-Aid to avoid rash.

In particular, lightly press the cut section where the nose touches so that any light ray will not enter eyes.

After treatment is completed, gently remove the eye mask.

Soft Water-proof Sheet / Sterilized Soft Water-proof Sheet

Pink

Cream

- Disposable sheet with high moisture permeability, water absorbability, and waterproof property.
- Soft, smooth material with high intensity is used.
- Moisture is permeable and alleviates stuffiness by film specification with moisture permeability.
- Quickly absorb liquid with absorption surface and thoroughly prevent leakage with water-proof layer.
- It is convenient because it is able to cut to prefer size.

Sterilized All-mat

Sterilized All-mat S

Sterilized All-mat with shirring S

3D side gather

- Disposable sterilized water-absorbable/water-proof mat to be used as a thick delivery mattress.
- Comfortable dry surface with high-absorption polymer, which allows a large amount of absorption of amniotic fluid and blood, etc., and prevents reverse flow.
- Perfect for use when cushioning properties and absorption power are required.
- Blended with antibacterial polymer to prevent odor from bacteria growth.
- Since the mat weight is nearly constant, it is convenient for measuring the amount of bleeding.
- The type that comes with shirring, the absorption mat's three-dimensional shirring blocks amniotic fluid and blood, and effectively prevents them from leaking from the side.

Sterilized Osaki Disposable Placenta Receiver

- This is a sterilized disposable placenta receiver that comes with scale marks, convenient for measuring the placenta.
- Since scales are inscribed on the bottom and the side, it can measure the placenta and the umbilical cord without having to use a tape measure, etc. Since measurement can be done inside the placenta receiver, things around it do not get dirty.
- Since the product weight (about 70g) is shown, the weight of the placenta receiver can be seen at a glance, which is convenient for measuring the weight of the placenta.
- Since there is a spout, the shape is designed to make it easy to transfer blood and other substances to another container when measuring the amount of blood or disposing of it.
- The shape makes it easy to slip it underneath the mother's body when collecting the placenta during afterbirth.
- The area of the parts to hold the dish is made large to prevent it from slipping even when carried with dirty gloves.

Gel Fine

Middle viscosity

High viscosity

Examples of use

Viscosity	Applications and use the site
Middle viscosity	For wide-range inspection like abnormal region
High viscosity	For curved surface and vertical surface's inspection like heart and neck.

- Sterilized gel for ultrasound examination by using which a clear image can be obtained with its high ultrasound conductivity.
- Little change in viscosity from that at ordinary temperature even after being warmed by a warmer (40°C) makes the examination easy.
- Sterilized by dry heat, and surfactant-free, colorant agent-free and fragrance-free. Therefore, safe to use in transvaginal ultrasound examination and for those with a delicate skin.
- Color-free and does not color the probe or clothes.
- Water soluble and comfortable without stickiness after wiping off.
- The viscosity can be choose according to purposes and using parts.
